

# PRESERVE LIFE

with the right tools at the right time.

Life-saving RAMPART kits from Safeguard Medical give first responders at any skill level the tools they need, when they need them most, to treat the leading causes of death during trauma situations.

Each kit is organised and standardised according to the proven **RAMPART™ Colour-Coded Trauma System**—an innovative, yet simple, colour-coded trauma care system that arranges products by colour and aligns them with an icon—making it faster and easier for individuals to choose the right product, at the right time, for the right treatment—and preserve life.

One Kit. One Lot Number.  
**Countless Lives Saved.**

Designed with logistics and budget in mind, each RAMPART System kit has a single lot number for **simple and seamless tracking** of expiration dates and inventory.

**Save manpower and manhours** so your team can concentrate on what matters most—saving lives.
